SKILLS

- C++
- C
- Web Development
- Python
- Data Structures
- SQL
- MongoDB
- MATLAB
- Hard Working
- Problem Solving

EDUCATION

B.Tech,CSE

IIIT Sricity

2020-2024

CGPA - 9.07

Intermediate,MPC

Narayana Junior College

2018-2020

GPA - 10.0

PROFILE

Happy and motivated Soul.Eager to contribute my knowledge and abilities in the field of software development.Responsible and eager to learn new things.My goal is to build a successfull career in the field of computer Science.

WORK EXPERIENCE

AI & ML Intern

Verzeo   AUG 2021 - OCT 2021

- Learned python and basics of machine learning.
- First one was basic MNIST handwritten digit recognition,which was implemented using Convolution nueral networks.
- Done 2 projects which include Email spam detection, to classify the mails we receive as spam or not. This was implemented in python using Support Vector Machines.

PROJECTS

Bone Marrow Donation

- Developed a complete website both front and back end from scratch.Main objective of our website is to help bone marrow patients.This application allows patients to find matching donors and many more.
- Tech Used : HTML CSS Node.js Mongodb Reactjs Redux Express js

Laptop Sales Management

- Build a Java project based on the management of laptops. It stores all the information regarding the laptops typically as in a store. We achieved this by making a database connection using MySQL and performing all CRUD operations. Tech Used Java SQL
